In the North American Review for April is a noteworthy article by Judge A. W. Tourjee, in which the professed reformers of the civil service are put on the defensive and their schemes of reform pronounced to be incompatible with American ideas of self-government, and on divers other grounds inadmissible and impracticable. The same number of the Review contains, under the fanciful title, The Thing that Might Be," a profoundly philosophical study of the laws and conlitions of human progress, by the Rev. Mark Pattison, Rector of Lincoln College, Oxford. The third article is a strong defense of the Roman Catholic side of the controversy about religion in the Public Schools, from the pen of Bishop McQuaid, of Rochester. The great problem of the governmental control of monopolies is discussed with reference to railway management by the Hon. George Ticknor Curtis, who contends that when a railway company is incorporated by any State it agrees to this much and no more: that its property shall be subject to such legislative control as the act of incorporation embraces, to the exercise of the taxing and police powers of the State, and to the power of eminent domain.
